

## BlueForce Cloud - The web area for your Conformities

The **BlueForce Cloud** platform allows you to collect on your private web area, all measurements sent with the **BlueForce Smart Pro** tester, with the previous testers and/or with the ones updated with the **Upgrade Pro**.

Automatic sending via the built-in GSM-GPS system enables the storage of all available data, such as force measurement parameters, the location of the site, the position of the instrument and even the point required by the **EN12453 standard**.

In addition to measurement management, the Cloud area allows you to prepare **all documents required for the correct certification** of automatic doors, such as the EC Declaration of Conformity, the Risk Analysis, the Test Reports, as well as the Maintenance Log.

**The BlueForce Cloud** system is multi-platform, it can be used on site with a simple smartphone, or in the office on a pc-desktop, the configuration is customisable with your own data and company logo.

Obviously it is possible to store in the internal database the data of your customers with the relevant **documents of the Technical file** of motorised gates and doors.

*To access the Cloud area you need to register, the service is accessible upon payment with an annual subscription, while for owners of the BlueForce Smart Pro and for those who make the Smart Pro Upgrade, access for the first year is free of charge. See the Microtronics website for the various types of subscription.*

### Content and Functions of the BlueForce Cloud Area

- Report of force measurements with related graphs
- Risk Analysis for: Sliding gate, Swing gate, Vertical doors, Flexible sectional door, Folding gate, Rolling doors, Garage Doors and Barriers
- EC Declaration
- Maintenance log
- Test report
- Acceptance report
- Document and photo archive for the Technical File
