

WARNING !!!

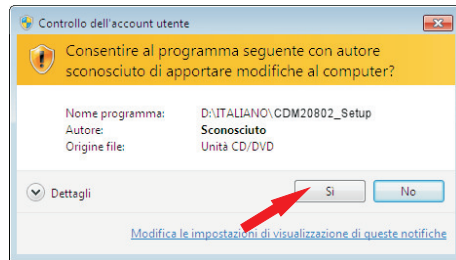

The file is **not harmful** and enables/allows your Browser or Antivirus program to download the file **driver_usb_blueforce_en.zip**

■ In case you need to reinstall the USB DRIVERS of the BlueForce / SpeedForce / BlueForce Smart instruments, perform the following steps:

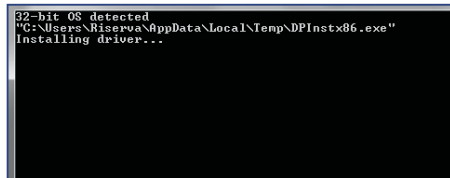

■ Download the file **driver_usb_blueforce_en.zip**, then extract the file **CDM20802_Setup.exe** onto the computer desktop.

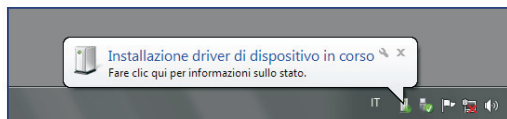

■ Allow the file download.

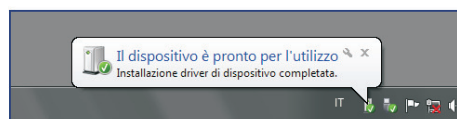

■ Run **CDM20802_Setup.exe** and wait for the DRIVER installation.

■ After a few seconds you will see the toolbar setup warning

■ At the end of the installation appears on the toolbar the confirmation notice

■ Connect the instrument to your PC, then launch the software to the serial port configuration of communication.
