

**FTP Thermal Printer - Art. 50V020**

**CHARACTERISTICS**

- **The FTP Printer** is equipped with a rechargeable lithium battery and features wireless-Bluetooth communications. Compact in size, it can be easily transported together with the device inside the carry case.
- Thanks to the FTP Printer, operators can produce test report printouts on the spot, with no need to use a PC since data can be sent straight from the BlueForce via Bluetooth (\*)
- The test reports generated by the FTP come partially compiled, and include a heading (to be completed by the operator) and a more specific section relating to the individual tests performed or the mathematical average of several tests, as required by the **EN12453 Standard (\*\*)**

**TECHNICAL DATA**

- Paper width: 58mm
- Paper type: thermal
- Printing speed: 90mm/sec
- Printing head approximate lifetime: 100 km
- Wireless interfaces available: Bluetooth 3.0
- Cable interfaces available: Standard USB
- Dimensions: 100x75x45mm approx.
- Weight: 150g approx.
- Working temperature: -10/+50 °C
- Power source: Li-Ion battery pack
- Battery charger included

(\*) Only compatible with BlueForce Smart 50V001G or the Upgrade Smart 50V016-G kit.

(\*\*) The test outcome (PASS / FAIL) must be entered by the operator, since it depends on the standard applied (EN12453 or alternative) in relation to the type of door and measuring point.

**Battery charger**

**58 mm thermal paper**
